Cellular Electron Microscopy Facility Usage Policy

General Conditions:

Article 1 New projects requiring cellular electron microscopy facility expertise must be presented to the facility members.

Service delivery applications can be collected by any member of the staff. Nevertheless, the projects are validated only after acceptance by the heads of the facility (Nadia Messaddeq and Nicolas Lemercier).

Article 2 The Facility staff will provide users with a project service delivery detailed quotation. This document must be signed by both **user and her/his team leader**, then sent back to the facility prior to any experiment.

Article 3 When scientific data collected by the EM facility are published, the EM facility is cited in the acknowledgments as follows:

«We thank the EM Facility of the Imaging Center of IGBMC, in particular Person1, Person2 for...»

A member of the facility staff taking a significant part in the experiments by implementing specific techniques or getting involved in data analysis, he/she is mentioned as a co-author of the article.

Article 4 The Facility gives data and analysis results to the user of the facility on a memory stick or an external hard drive. The Facility does not ensure data storage.

Training and autonomous users access:

Article 5 Access to the CM12 electron microscope is possible on request for autonomous users after training and acceptance by the engineer in charge of the microscope and the head of the facility.
